

Submersible Pilot & Field Operations (FT)

Who are we?

U-Boat Worx is based in The Netherlands and was founded in 2005. Since its inception we have become the world's leading manned submersible manufacturer. U-Boat Worx offers high-end exploration submersibles ranging from 2-person to 11-person models, available in depth-ratings ranging from 100 meters up to 3,000 meters. The submersibles use the latest advancements in technology to provide clients – who include super yacht owners, research organizations, offshore companies and high-end tourist operators – with the safest and best performing submersibles.

What will you do?

You will become part of the Field Operations team, which is responsible for all submersible operations in various locations around the world. The team also takes care of maintenance, spare parts, technical documentation, annual re-certification and any other service that's required by our customers.

To become a fully qualified submersible pilot will take a few months of on-the-job training, as well as a solid technical familiarization of the equipment. You will eventually be representing U-Boat Worx onboard super yachts and cruise ships, making sure the subs are maintained and operated according to highest possible standards.

Who are you?

You are ambitious, have completed a mid/higher technical education, preferably have several years work experience in a technical role and have a hands-on mentality. Experience in the maritime or offshore industry would be a big advantage, as well as an affinity with the underwater world and a proven capability of working independently.

You are a team player and are able to take the responsibility to lead a team of colleagues and interact with clients in the various situations. You have the ability to analyze, improvise and supply feedback on the spot to solve problems in a safe and reliable way.

You have a good command of English. You are goal-focused and present well.

This role requires a high degree of flexibility and involves frequent international submersible operations ranging from 1-2 days up to 2 months at a time.

What do we offer?

We offer a pleasant, challenging and dynamic work environment with an ambitious team of like-minded professionals. You will have the opportunity to expand your personal horizons in an agile organization, which is looking to build a legacy based on a fleet of the world's best submersibles. We start with a full training course to become familiar with all technical and operational aspects of our submersibles. You will also be trained to become a licensed U-Boat Worx Submersible Pilot and Surface Officer.

How to apply?

If you feel you are a good match with this profile, please send your CV with a compelling motivation letter in English to Ms. Regina van Krimpen via humanresources@uboatworx.com. You can contact our office at +31 (0)76-5713096.
